Another Priority Action Plan Completes its Final Deliverables!

PAP 06, tasked with translating ANSI C12.19 metering tables to and from a common semantic model, has completed its final deliverable and has been approved to close by the PMO and Governing Board. The closure of this PAP realizes the completion of seven out of fourteen of the original Priority Action Plans identified in the 2009 EPRI Report to NIST on the Smart Grid Interoperability Standards Roadmap. The PAP 06 Working Group White Paper is freely and publicly available on the SGIP's [Interoperability Knowledge Base \(IKB\)](#), and is being provided to numerous Standards Setting Organizations (SSOs) as a contribution to their efforts, including ANSI C12 WGs, IEC WGs, IEEE, and MultiSpeak.

Congratulations to Tom Nelson (NIST PAP lead), Aaron Snyder (EnerNex PAP Technical Champion), and the entire PAP 06 Working Group for a job well done!

SGIP Participation Opportunities

As mentioned during last Friday's Plenary meeting, there are a variety of SGIP working groups seeking new members with particular expertise. SGIP groups provide a way for members old and new to collaborate, meet new colleagues and become involved in the development of positions, issues, white papers, programs, and other activities that benefit the Smart Grid community.

- The Vehicle-to-Grid Domain Expert Working Group (V2G DEWG) mission is to clarify PEV business objectives, prioritize corresponding PEV-grid interactions and identify the service interfaces and standards needed (syntax and semantics of information transfer, service interface protocols, cross-cutting issues, business and policy level). They are seeking members ready to lead and take charge. Learn more: <http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/V2G> or contact Jeffrey Mazer, NIST (jeffrey.mazer@nist.gov).
- Gas Infrastructure Working Group is just getting underway and seeking members knowledgeable about the interaction between the gas delivery and electric power delivery grids with respect to interoperability standards, common technological paradigms, and associated system implementations. Learn more: <https://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/NaturalGasWG>.
- Have strong connections in other countries? The International Task Force could use your help with current and proposed collaboration agreements. Learn more: <http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/SGIPWorkingGroupGBITF>.

Reminder: Interested in SGIP 2.0? Attend BSPWG Meetings

If you are interested in the progress of SGIP 2.0, Inc., the Business Sustainment Plan Working Group is holding meetings every other Monday at 5:30pm Eastern. The group plans to meet until the end of the year. To join the next meeting on Oct. 1, signup at <https://www2.gotomeeting.com/register/563068906>.

LEARN MORE ABOUT THE TRANSITION : <https://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/BSPWG>

Resource: Archived SGIP Meeting Materials

Seeking the Governing Board minutes? Last week's Plenary presentations? Slides from our March Face-to-Face? You can find all archived materials by visiting the TWiki. In the top bar navigation, select "News & Events" then

“Meetings Archive.”

Contact SGIP Leadership and Administrator at sgipgb.administrator@enernex.com

EnerNex serves as the SGIP Administrator under a NIST-awarded contract. For more information, [click here](#).
